1. INTRODUCTION TO INDUSTRY-

Persistent Technology is a reputed IT service provider specializing in web development, computer hardware and networking service, industrial training. The organization aims to empower students and clients with cutting-edge technical knowledge and practical skills. During my three-month industrial training at Persistent Technology, I was placed under the Web Development Department, where I primarily worked on WordPress website design and development projects. The training was designed to provide practical exposure to industry standard tools, technologies, and project workflows followed in modern web development environments.

Core Areas of Work:

- Website Design and Development
- IT Training and Certification Programs
- Digital Marketing Solutions
- Hosting Services

Objective of the Training

The main objectives of this industrial training were:

- To gain practical exposure to **WordPress development** and its ecosystem.
- To understand the **process of designing, developing, and deploying** dynamic websites.
- To work on **real-time projects** involving clients' requirements.
- To improve technical, communication, and teamwork skills.

Tools and Technologies Used

- **WordPress**
- **HTML5, CSS3, JavaScript**
- **Elementor / WPBakery Page Builder**
- **cPanel (for deployment)**

- **Plugins: Contact Form 7, Smart Slider 3, Widgets for google reviews, WPForms**
- **Themes: Education Spark, Bam, and Custom Themes**

Tasks and Responsibilities

During the training period, the following key tasks were performed:

1. **Learning WordPress Fundamentals**
   - o Installation and configuration of WordPress..
   - o Understanding the structure of themes and plugins.
2. **Website Design & Development**
   - o Designing responsive layouts using Elementor and custom CSS.
   - o Creating menus, pages, and interactive elements.
   - o Integrating media, galleries, and forms.
3. **Plugin and Theme Customization**
   - o Installing and configuring plugins for SEO, security, and performance.
   - o Editing theme files using PHP and CSS for custom requirements.
4. **Database and Hosting Management**
   - o Deploying websites on live servers via cPanel.
5. **Testing and Optimization**
   - o Performing website speed and mobile responsiveness tests.
   - o Implementing SEO-friendly design and on-page optimization.
6. **Final Project Work**
   - o Developed a complete functional website for a sample client/business.
   - o Presented and deployed the website as part of the final assessment.

Skills Gained

Through this training, I developed both technical and professional skills:

Technical Skills

- WordPress Installation & Customization
- HTML, CSS, and JavaScript integration
- Website Deployment & Hosting
- SEO and Performance Optimization

Soft Skills

- Communication and Team Collaboration
- Time Management and Project Planning
- Problem-Solving and Critical Thinking

Challenges and Solutions

Challenge	Solution
Theme compatibility issues	- Learned to use child themes and troubleshoot conflicts
Plugin conflicts	- Tested plugins in staging environment before applying
Website loading speed	- Optimized images and used caching plugins
Responsive design errors	- Used CSS media queries and tested on multiple devices

Conclusion

The 3-month industrial training at Persistent Technology was a valuable learning experience. It provided hands-on exposure to website design, development, and deployment using WordPress. The training enhanced my technical knowledge, practical understanding, and teamwork skills, preparing me for a successful career in the IT industry.
